ACS Code	Expected Commitment to OAR	National Target	R1	R2	R3	R4	R5	R6	R7	R8	R9	R10	Total
<p>This spreadsheet contains the commitments that the Regions are to bid on in the Annual Commitment System database.</p> <p>Development of these commitments began approximately a year ago as part of OAR's FY 2007 budget and performance measure development process that involved HQ and the Regions. Regional Sub-leads and HQ program offices worked together to develop and refine the commitments in the specific program areas. The wording of the commitments, and the expected targets, were further refined as a result of comments received on the draft commitments that were available on the OCFO website from March 10 to April 7.</p> <p>In addition to the commitments for Regional bidding, this document also includes commitments HQ is making. The HQ commitments impart a degree of accountability onto HQ because typically the HQ commitment must be completed to enable Regions to complete their related commitment.</p> <p>The numbers and words in the Regional columns represent the target bids that HQ is expecting from the Regions. The final values will be negotiated and agreed upon through the Annual Commitment System bidding process.</p> <p>The national target column represents the total accomplishment that HQ is expecting from the Regions. National targets of Yes will typically require an end of year summary report discussing what the Region accomplished with respect to that activity. The final values will be negotiated and agreed upon through the Annual Commitment System bidding process. This bidding process will occur between July 10, 2006 and September 22, 2006.</p>													
OMB PART NAAQS Implementation	Improve the population-weighted ambient concentrations of ozone. Base year is FY2003.	6%	Achievement of these targets will be assessed and determined at the national level only. States and Regions are encouraged to enter and quality assure ambient data consistent with data reporting requirements.										
OMB PART	Improve the population-weighted ambient concentrations of PM <sub>2.5</sub> . Base year is FY 2003.	3%											
OMB PART	Reduce AQI days over 100, weighted by population and AQI value. Base year is FY2003. States report annually the number of AQI days over 100 by nonattainment area.	21%
